## Service and Maintenance

Sports and activity equipment is integral to physical education and participation and it is of paramount importance to keep all equipment adequately maintained and records kept up-to-date. It is a requirement that all PE and sports equipment should be checked and maintained on a yearly basis to provide the required duty of care and to comply with BS 1892 Part 1 1986.

One of our key areas of expertise is the service and maintenance of sports and activity equipment.

We offer comprehensive service and maintenance solutions for all your PE and sports equipment tailored to suit individual requirements. Our experienced and qualified Service Technicians carry out thorough checks on all fixed and loose sports equipment and then we provide a detailed report. This documentation of annual checks can also be required to comply with OFSTED inspections.

Sports Facility Services will give attention to all major fixed and portable items of equipment used in physical education through a regular programme of inspection, maintenance, repair and replacement. So you can have peace of mind and you can also help optimise the availability and lifespan of your equipment.

If you already have a service provider in place then that's great, but if you want to look at an alternative supplier then please get in touch. If you don't have a service provider in place then please contact us without delay. We would welcome the opportunity to work with you and provide the necessary service and maintenance for your PE and sports equipment.

Please contact us with your service and maintenance requirements and we will gladly offer our advice and submit a formal quotation.
